

# Job Portal System - Feature Sequence (Standard Flow)

## 1. Landing / Home Page

- Navigation bar (top): Left: Home | Jobs | Companies | About | Contact; Right: Profile/Login icon
- Search box (center): Search by job title, location, or company
- Job listing preview: List of 10 jobs showing Role | Company | Location | Posted Date
- Footer: Links (Terms, Privacy, Help)

## 2. Authentication

- Jobseeker Login/Register: Register with details + upload resume
- Recruiter Login/Register: Register company details, email verification
- Admin Login: Admin created from backend

## 3. Jobseeker Dashboard

- Profile Page (resume, skills, experience, applied jobs history)
- Job Search & Apply
- Saved Jobs (wishlist)
- Notifications (applied job updates, recruiter messages)

## 4. Recruiter Dashboard

- Post a Job (role, description, salary, location)
- Manage Jobs (edit, close, delete)
- View Applicants (list of seekers applied → view profile/resume)
- Shortlist or Reject Applicants

## 5. Admin Dashboard

- Manage Users (approve/reject recruiters, block jobseekers if fake)
- Manage Jobs (approve jobs before publishing if needed)
- Generate Reports (total jobs posted, seekers registered, applications)

## 6. Additional Features (Good to Have)

- Filters: by Location, Role, Company, Salary Range
- Pagination / Load More Jobs
- Company Profiles: Recruiter page showing company info + all active jobs
- Email/Notification System: Jobseeker gets email when shortlisted
- Analytics for Recruiters: How many applied for each job
